It is my pleasure to introduce this special issue containing mainly the best papers of the conference SIBGRAPI 2008, the most important Brazilian meeting in Computer Graphics, Image Processing, and Computer Vision. These papers have been carefully reviewed and extended for the Visual Computer Journal.

In addition to these special papers, one additional paper has been selected for publication.

It is authored by Juntao Ye, Robert E. Webber and Yangsheng Wang from the institution of Automation, Chinese Academy of Sciences and the University of Western Ontario. It deals with a Reduced Unconstrained System for the Cloth Dynamics Solver.

Editor-in-Chief
The Visual Computer
